- Compatible: GAP

Highlights

Crystal Clear Sound Quality
The use of digital communication virtually eliminates interference, buzzing and hissing. It improves the intelligibility of messages left on the answering machine and even making it possible for users to record and reproduce music.

Handsfree on Handset
The handsfree speaker phone lets you hold a conversation while your hands are busy with something else and wherever you are. With both the speaker and the microphone in front of the handset, it is just like talking face to face with your correspondent.

Polyphonic ringtones
A polyphonic ringtone means that the phone can play many tones simultaneously, so that an accurate musical performance is possible, and when played through the phone's speaker these polyphonic ringtones sound like real music.

Name and number display
The alphanumeric display offers the possibility to display numbers as well as letters, and lets to assign a name to a number.

Backlit LCD display
Backlit LCD display

Ergonomic Design
The smooth rounded shaped handset fits perfectly in your hand for natural, balanced operation. It looks great too!
